PRESIDENT'S MESSAGE

by Vicki Lee

A media therapist states that just as ancient sculptors are said to have "flourished" in the 3rd century, B.C., our human task is to flourish -- to find our path, develop our gifts, and then to flourish in the expression of them.

Flourishing as a part of a couple is a highly complex endeavor, new to our time. Successful marriages of the past, always a limited percentage, usually followed an accommodation model -- spouses both assumed that only one of them would be actively seeking achievement in the world, while the other would provide needed support services. Today's couples are pioneers in the attempt to find ways for both people to "flourish" and stay committed.

Living our vision is possible, whatever our marital status. Join us on the 9th as we discuss our own and our client's journey towards the simultaneous prospering of love and achievement.

CALL FOR PROPOSALS (update on)

February 4, 1984 will be the day of the first CAMFT -- Foothill College festival, Software for Families; Human Issues of the 80's. Since we are facing an early publicity deadline, we are asking for proposal summaries to be submitted immediately. Send or call in a brief summary of your proposed topic, your background, previous presentations, and other information which will assist us in our selection decisions to: ONTOS, 160 Saratoga Avenue, #42, Santa Clara, CA 95050, (408) 243-1200. Deadline is October 7, but earlier proposals will be given the most consideration.
